

## **Mining Engineering Opportunities**

New Gold Inc is currently developing Canada's only block cave underground mining operation. The New Afton Mine is located 10 km west of Kamloops, BC and opportunities exist for Mining Engineers to be part of an exciting and technically interesting project. The project is scheduled to go into production in mid 2012 and underground development is now at the ore body with mining of the extraction and undercut levels about to commence.

At this time a variety of openings exist within the Technical Services Department for Mining Engineers with between 3 to 10 years of underground hard rock mining experience.

The team at the New Afton site have created a dynamic and enthusiastic work place with a philosophy of building a team environment where everyone works together to achieve the common goal. All employees on site are salaried, including the underground mining and maintenance personnel, and the project utilizes state of the art techniques and equipment. A mindset of continuous improvement and innovation is a key component to ensuring the success of the project.

The New Afton site provides the opportunity to undertake interesting work in a positive team environment whilst living in a substantial regional centre with a great climate.

Kamloops is a city of 90,000 people located 350 km east of Vancouver. The area provides the opportunity to live and work in a vibrant community with its own University and within easy reach of world class ski resorts, championship golf courses, popular recreational lakes and the vineyards of the Okanagan Valley.

Interested candidates are encouraged to visit [www.newgold.com/careers](http://www.newgold.com/careers) to review these opportunities further. Qualified candidates should submit a cover letter and résumé outlining your qualifications and experience to [careers.newafton@newgold.com](mailto:careers.newafton@newgold.com) quoting the job title and number in the subject line.
